

The GO Business Cloud Infrastructure

GO Business Cloud Infrastructure

High Performance Data Centre – Location A

High availability is delivered through full redundancy across hardware, communications and power.

High availability, reliability and performance is further delivered through full redundancy across operating systems, server clustering and real-time mirroring.

GO Business Clustered (Virtual) Servers

- Management Servers A and B
- Active Directory and Server Farm Services
- Remote Desktop Servers A and B
(English Office 2003 Applications)
- Remote Desktop Servers C and D
(English Office 2010 Applications)
- Remote Desktop Servers E and F
(Chinese Office 2003 Applications)
- Remote Desktop Servers G and H
(Chinese Office 2010 Applications)
- Remote Desktop Servers E and F
(Thai Office 2003 Applications)
- Remote Desktop Servers G and H
(Thai Office 2010 Applications)
